Summary

Full-stack engineer with about two years of experience building web apps and fintech backends in TypeScript, NestJS and Next.js. At BridgePay I work on payment features built on the SafeHaven MFB API, including NGN virtual accounts, deposit webhooks and USD card issuance, and on the PostgreSQL schemas that keep wallet balances accurate. Before that I built frontends for a delivery platform and an e-commerce store.

Skills

Languages: TypeScript, JavaScript

Backend: NestJS, Node.js, REST APIs, Swagger/OpenAPI, JWT, role-based access control, webhooks

Databases: PostgreSQL (Neon), MongoDB, Prisma ORM

Frontend: Next.js (App Router), React, React Native (Expo), Redux Toolkit, TanStack Query, Tailwind CSS, shadcn/ui

Payments: SafeHaven MFB API, NGN virtual accounts, USD virtual cards, webhook reconciliation

Tools: Git, GitHub, MQTT

Experience

Full-Stack Engineer, BridgePay | Nov 2025 – Present

- Build and ship features across the platform's NestJS API and Next.js web apps.
- Design PostgreSQL (Neon) schemas with Prisma and use database transactions to keep wallet balances and financial records consistent.
- Designed authentication and role-based access control for the backend services.

Full-Stack Engineer (Intern), BridgePay | Jun 2025 – Nov 2025

- Integrated the SafeHaven MFB API and webhooks to create NGN virtual accounts, track deposits in real time and issue virtual USD cards.
- Built REST APIs in NestJS and managed ledger schemas with Prisma and MongoDB.
- Fixed errors caused by the undocumented legacy backend, resolved conflicting and redundant API implementations, and wrote the Swagger documentation.
- Built the customer and admin portals in Next.js with Redux Toolkit and TanStack Query, with live balance updates and card management.

Frontend Engineer (Contract), Ubakco Delivery | Aug 2025 – Sep 2025 | ubakco.vercel.app

- Built the full frontend for a parcel delivery platform using Next.js, TypeScript, shadcn/ui and Tailwind CSS.
- Implemented dispatch booking and order tracking flows with a responsive layout that works across devices.

Full-Stack / Frontend Developer, Dradiant Bags | Aug 2024 – Feb 2025 | dradiant-brown.vercel.app

- Built and deployed an e-commerce store using Next.js, TypeScript and Tailwind CSS.
- Added product filtering, a persistent shopping cart and a responsive checkout flow.

Education

B.Eng. Mechatronics Engineering, Federal University of Technology, Minna (FUTMinna) | Oct 2026 | CGPA: 4.04/5.0
